

How Can You Represent the Data?

For each data set:

- Draw a graph to represent the data. Justify your choice of graph.
- Identify another type of graph that could be used to represent the same data. Justify your choice.

Data set 1: Favourite Streaming Service			Data set 2: Average Monthly Rainforest Rainfall	
Streaming app	Number of students	Number of teachers	Month	Rainfall amount (mm)
Goodflix	5	9	January	260
TV Plus	2	1	February	280
Superview	3	1	March	320
ViewIt	2	1	April	300
			May	258
			June	115
			July	90
			August	55
			September	75
			October	130
			November	175
			December	210
