

Representing a Pattern

My first pattern, extended to 5 terms

Table of values

| Term number | Term value |
|-------------|------------|
|             |            |
|             |            |
|             |            |
|             |            |
|             |            |

Relationship between the term value and term number

Algebraic expression that describes the pattern

Using substitution to verify expression

Name\_\_\_\_\_ Date\_\_\_\_\_

**Patterns and Relations**  
**Unit 2 Line Master 1b**

## Representing a Pattern (cont'd)

My second pattern, extended to 5 terms

Table of values

| Term number | Term value |
|-------------|------------|
|             |            |
|             |            |
|             |            |
|             |            |
|             |            |

Relationship between the term value and term number

Algebraic expression that describes the pattern

Using substitution to verify expression
