Grade 5 ☐ This is my default grade

A. Social-Emotional Learning (SEL) Skills	B. Number	C. Algebra	D. Data	E. Spatial Sense	F. Financial Literacy
A1. Social-Emotional Learning (SEL) Skills and the Mathematical Processes: apply, to the best of their ability, a variety of social-emotional learning skills to support their use of the mathematical processes and their learning in connection with the expectations in the other five strands of the mathematics curriculum					

5 Choose an overall Expectation

Grade 5 ☐ This is my default grade

A. Social-Emotional Learning (SEL) Skills	B. Number	C. Algebra	D. Data	E. Spatial Sense	F. Financial Literacy
B1. Number Sense: demonstrate an understanding of numbers and make connections to the way numbers are used in everyday life					
B2. Operations: use knowledge of numbers and operations to solve mathematical problems encountered in everyday life

✓ Planning Tool (3-4) ¹

B2. Operations: use knowledge of numbers and operations to solve mathematical problems encountered in everyday life ^

-  Properties and Relationships: B2.1 use the properties of operations, and the relationships between operations, to solve problems involving whole numbers and decimal numbers, including those requiring more than one operation, and check calculations
-  Math Facts: B2.2 recall and demonstrate multiplication facts from 0×0 to 12×12 , and related division facts
-  Mental Math: B2.3 use mental math strategies to multiply whole numbers by 0.1 and 0.01 and estimate sums and differences of decimal numbers up to hundredths, and explain the strategies used
-  Addition and Subtraction: B2.4 represent and solve problems involving the addition and subtraction of whole numbers that add up to no more than 100 000, and of decimal numbers up to hundredths, using appropriate tools, strategies, and algorithms
-  Addition and Subtraction: B2.5 add and subtract fractions with like denominators, in various contexts
-  Multiplication and Division: B2.6 represent and solve problems involving the multiplication of two-digit whole numbers by two-digit whole numbers using the area model and using algorithms, and make connections between the two methods
-  Multiplication and Division: B2.7 represent and solve problems involving the division of three-digit whole numbers by two-digit whole numbers using the area model and using algorithms, and make connections between the two methods, while expressing any remainder appropriately
-  Multiplication and Division: B2.8 multiply and divide one-digit whole numbers by unit fractions, using appropriate tools and drawings
-  Multiplication and Division: B2.9 represent and create equivalent ratios and rates, using a variety of tools and models, in various contexts

|---|--|---|
|  | Number: Readiness Task: Fluency with Multiplication and Division
Multiplicative relationships are foundational to many number concepts such as fractions, percents, ratios, and rates. Many of our everyday decisions are based on additive or multiplicative thinking. It is important for students to recognize the difference...
TAGS: Grade 5 Readiness Task Number-4 |  FAVOURITE |
|   | Fluency with Multiplication and Division: Using Estimation for Multiplication and Division
In pairs, students estimate a product and a quotient to solve story problems related to the cost of chess sets and the number of bags of cookies. To consolidate, students share their estimation strategies for multiplying and dividing, and discuss when it...
TAGS: Grade 5 Activity Number-20 |  FAVOURITE |
|   | Fluency with Multiplication and Division: Strategies for Multiplying Larger Numbers
To start, students use Base Ten Blocks to model the product of a 3-digit number by a 1-digit number, then review the use of the distributive property to determine the product. In pairs, students determine 5 products from different multiplication statements...
TAGS: Grade 5 Activity Number-21 |  FAVOURITE |
|   | Fluency with Multiplication and Division: Multiplying Whole Numbers
In pairs, students discuss two different models (using an array and Base Ten Blocks) for solving a 2-digit by 2-digit multiplication story problem about eggs, then decide which model is correct. To consolidate, students compare and contrast the two models...
TAGS: Grade 5 Activity Number-22 |  FAVOURITE |
|  | Fluency with Multiplication and Division : Consolidation
Depending on the requirements of your curriculum, pairs of students solve multiplication and division problems involving sharing frozen treats equally among teams, and a ratio problem related to the different flavours of treats. To consolidate, students... |  FAVOURITE |
