

Mathology 2 Correlation (Number) – Ontario

Curriculum Expectations	Mathology Grade 2 Classroom Activity Kit	Mathology Little Books	Pearson Canada K–3 Mathematics Learning Progression
Overall Expectation B1. Number Sense: demonstrate an understanding of numbers and make connections to the way numbers are used in everyday life			
Specific Expectation Whole Numbers			
B1.1 read, represent, compose, and decompose whole numbers up to and including 200, using a variety of tools and strategies, and describe various ways they are used in everyday life	Teacher Cards Number Cluster 2: Number Relationships 1 11: Decomposing to 20 12: Number Relationships 1 Consolidation Number Cluster 3: Grouping and Place Value 13: Building Numbers New Activity: Building Numbers to 200 14: Making a Number Line 16: Grouping and Place Value Consolidation Number Cluster 5: Number Relationships 2 22: Benchmarks on a Number Line 23: Decomposing 50 New Activity: Decomposing to 200 Number Cluster 9: Financial Literacy 44: Earning Money Number Math Every Day Cards 1A: Skip-Counting on a Hundred Chart; Skip-Counting from Any Number 1B: Skip-Counting with Actions 2A: Show Me in Different Ways; Guess My Number 2B: Math Commander; Building an Open Number Line	What Would You Rather? Ways to Count Back to Batoche The Great Dogsled Race To Scaffold: Paddling the River A Family Cookout At the Corn Farm How Many Is Too Many? To Extend: Fantastic Journeys Finding Buster Math Makes Me Laugh The Street Party Sports Camp	Big idea: Numbers tell us how many and how much.
			Recognizing and writing numerals - Names, writes, and matches two-digit numerals to quantities. - Names, writes, and matches three-digit numerals to quantities. Unitizing quantities into ones, tens, and hundreds (place-value concepts) - Writes, reads, composes, and decomposes two-digit numbers as units of tens and leftover ones. - Writes, reads, composes, and decomposes three-digit numbers using ones, tens, and hundreds.

	<p>3A: Adding Ten 3B: Describe Me 5A: Building Numbers 5B: How Many Ways?</p>		
<p>B1.2 compare and order whole numbers up to and including 200, in various contexts</p>	<p>Teacher Cards Number Cluster 2: Number Relationships 1 6: Comparing Quantities 7: Ordering Quantities New Activity: Comparing and Ordering Numbers to 200 12: Number Relationships 1 Consolidation Number Cluster 5: Number Relationships 2 22: Benchmarks on a Number Line</p>	<p>What Would You Rather? Back to Batoche The Great Dogsled Race Family Fun Day</p> <p>To Scaffold: Paddling the River A Family Cookout To Extend Fantastic Journeys</p>	<p>Big Idea: Numbers are related in many ways. Comparing and ordering quantities (multitude or magnitude) - Compares and order quantities and written numbers using benchmarks. - Orders three or more quantities using sets and/or numerals.</p>
<p>B1.3 estimate the number of objects in collections of up to 200 and verify their estimates by counting</p>	<p>Teacher Cards Number Cluster 2: Number Relationships 1 10: Estimating with Benchmarks</p>	<p>What Would You Rather? Ways to Count</p> <p>To Scaffold: At the Corn Farm A Family Cookout To Extend Fantastic Journeys</p>	<p>Big Idea: Numbers are related in many ways. Estimating quantities and numbers - Uses relevant benchmarks (e.g., multiples of 10) to compare and estimate quantities.</p>
<p>B1.4 count to 200, including by 20s, 25s, and 50s, using a variety of tools and strategies</p>	<p>Teacher Cards Number Cluster 1: Counting 1: Bridging Tens 2: Skip-Counting Forward 3: Skip-Counting Flexibly 4: Skip-Counting Backward 5: Counting Consolidation Number Cluster 3: Grouping and Place Value 14: Making a Number Line 15: Grouping to Count 16: Grouping and Place Value Consolidation Number Cluster 5: Number Relationships 2 24: Jumping on the Number Line 25: Number Relationships 2 Consolidation Number Math Every Day Cards</p>	<p>What Would You Rather? Ways to Count Family Fun Day A Class-full of Projects The Best Birthday The Money Jar</p> <p>To Scaffold: On Safari! Paddling the River How Many Is Too Many?</p> <p>To Extend: Finding Buster How Numbers Work Math Makes Me Laugh Planting Seeds</p>	<p>Big Idea: Numbers tell us how many and how much. Applying the principles of counting - Says the number name sequences forward and backward from a given number. - Uses number patterns to bridge tens when counting forward and backward (e.g., 39, 40, 41). - Fluently skip-counts by factors of 10 (e.g., 2, 5, 10) and multiples of 10 from any given number. - Uses number patterns to bridge hundreds when counting forward and backward (e.g., 399, 400, 401). - Fluently skip-counts by factors of 100 (e.g., 20, 25, 50) and multiples of 100 from any given number.</p>

	1A: Skip-Counting on a Hundred Chart; Skip-Counting from Any Number 1B: Skip-Counting with Actions 3A: Adding Ten 3B: Thinking Tens 8A: Counting Equal Groups to Find How Many; I Spy 8B: How Many Blocks?; How Many Ways? 9: Collections of Coins	Calla's Jingle Dress	
B1.5 describe what makes a number even or odd	Teacher Cards Number Cluster 2: Number Relationships 1 8: Odd and Even Numbers	Ways to Count	Big Idea: Numbers tell us how many and how much.
Specific Expectation Fractions			
B1.6 use drawings to represent, solve, and compare the results of fair-share problems that involve sharing up to 10 items among 2, 3, 4, and 6 sharers, including problems that result in whole numbers, mixed numbers, and fractional amounts	Teacher Cards Number Cluster 4: Early Fractional Thinking 17: Equal Parts 18: Comparing Fractions 1 19: Comparing Fractions 2 20: Regrouping Fractional Parts New Activity: Fractions of a Set New Activity: Comparing and Ordering Fractions of a Set 21: Early Fractional Thinking Consolidation Number Math Every Day Cards 4A: Equal Parts from Home; Modelling Fraction Amounts 4B: Naming Equal Parts	The Best Birthday To Extend: Hockey Homework	New Big Idea: Quantities and numbers can be grouped by or partitioned into equal-sized units. Unitizing quantities and comparing units to the whole - Partitions whole into equal-sized units and identifies the number of units and the size of, or quantity in, each unit. Partitioning quantities to form fractions - Partitions wholes into equal-sized parts to make fair shares or equal-sized groups. - Partitions wholes (e.g., intervals, sets) into equal parts and names the unit fractions.
B1.7 recognize that one third and two sixths of the same whole are equal, in fair-sharing contexts Note: a new Activity is needed to address this expectation. It could also	Teacher Cards New Activity: Fractions of a Set	To Extend: Hockey Homework	Big Idea: Quantities and numbers can be grouped by or partitioned into equal-sized units. Partitioning quantities to form fractions - Partitions whole into equal-sized parts to make fair shares or equal-sized groups. - Partitions wholes (e.g., intervals, sets) into equal parts and names the unit fractions.

<p>review the Grade 1 expectation re one-half and two-fourths. There is no reference to equivalent fractions in the Learning Progression.</p>			
<p>Overall Expectation</p>			
<p>B2. Operations: use knowledge of numbers and operations to solve mathematical problems encountered in everyday life</p>			
<p>Specific Expectation</p>			
<p>Properties and Relationships</p>			
<p>B2.1 use the properties of addition and subtraction, and the relationships between addition and multiplication and between subtraction and division, to solve problems and check calculations</p>	<p>Teacher Cards Number Cluster 6: Conceptualizing Addition and Subtraction 26: Exploring Properties 27: Solving Problems 1 28: Solving Problems 2 29: Solving Problems 3 30: Solving Problems 4 31: Conceptualizing Addition and Subtraction Consolidation Number Cluster 8: Early Multiplicative Thinking 40: Exploring Repeated Addition 41: Repeated Addition and Multiplication New Activity: Repeated Subtraction and Division Activity 42 Early Multiplicative Thinking Consolidation</p>	<p>Array’s Bakery Marbles, Alleys, Mibs, and Guli! The Great Dogsled Race</p> <p>To Scaffold: Canada’s Oldest Sport</p> <p>To Extend: The Street Party Planting Seeds Sports Camp Calla’s Jingle Dress</p>	<p>Big Idea: Quantities and numbers can be added and subtracted to determine how many or how much.</p> <p>Developing conceptual meaning of addition and subtraction</p> <ul style="list-style-type: none"> - Uses symbols and equations to represent addition and subtraction situations. - Models and symbolizes addition and subtraction problem types (i.e., join, separate, part-part-whole, and compare). - Relates addition and subtraction as inverse operations. - Uses the properties of addition and subtraction to solve problems (e.g., adding or subtracting 0, commutativity of addition). <p>Big Idea: Quantities and numbers can be grouped by, and partitioned into, units to determine how many or how much.</p> <p>Developing conceptual meaning of multiplication and division</p> <ul style="list-style-type: none"> - Uses repeated addition of groups to solve problems. - Models and symbolizes equal sharing and grouping division problems, and relates them to subtraction. <p>Big Idea: Patterns and relations can be represented with symbols, equations, and expressions.</p>

			<p>Understanding equality and inequality, building on generalized properties of numbers and operations</p> <ul style="list-style-type: none"> - Investigates addition and subtraction as inverse operations. - Explores properties of addition and subtraction (e.g., adding or subtracting 0, commutativity of addition).
<p>Specific Expectation Math Facts</p>			
<p>B2.2 recall and demonstrate addition facts for numbers up to 20, and related subtraction facts</p>	<p>Teacher Cards Number Cluster 7: Developing Operational Fluency 32: Complements of 10 33: Using Doubles 34: Fluency with 20 New Lesson: Mastering Addition and Subtraction facts 36: Developing Operational Fluency Consolidation Number Cluster 9: Financial Literacy 45: Spending Money Number Math Every Day Cards 6: What Math Do You See?; What Could the Story Be? 7A: Doubles and Near-Doubles; I Have... I Need... 7B: Hungry Bird; Make 10 Sequences</p>	<p>Array's Bakery Marbles, Alleys, Mibs, and Guli! A Class-full of Projects The Money Jar The Great Dogsled Race What Would You Rather?</p> <p>To Scaffold: That's 10! Buy 1—Get 1 Canada's Oldest Sport</p> <p>To Extend: The Street Party Planting Seeds Sports Camp Calla's Jingle Dress</p>	<p>Big Idea: Quantities and numbers can be added and subtracted to determine how many or how much.</p> <p>Developing fluency of addition and subtraction computation</p> <ul style="list-style-type: none"> - Fluently adds and subtracts with quantities to 10. - Fluently recalls complements to 10 (e.g., $6 + 4$; $7 + 3$). - Extends known sums and differences to solve other equations (e.g., using $5 + 5$ to add $5 + 6$). - Fluently adds and subtracts with quantities to 20.
<p>Specific Expectation Mental Math</p>			
<p>B2.3 use mental math strategies, including estimation, to add and subtract whole</p>	<p>Teacher Cards Number Cluster 7: Developing Operational Fluency</p>	<p>Marbles, Alleys, Mibs, and Guli! A Class-full of Projects The Money Jar</p>	<p>Big Idea: Quantities and numbers can be added and subtracted to determine how many or how much.</p>

<p>numbers that add up to no more than 50 and explain the strategies used</p>	<p>New Lesson: Mastering Addition and Subtraction facts</p> <p>35: Multi-Digit Fluency</p> <p>Number Math Every Day Cards 7A: Doubles and Near-Doubles</p>	<p>The Great Dogsled Race</p> <p>To Scaffold Hockey Time Canada’s Oldest Sport</p> <p>To Extend How Numbers Work</p>	<p>Developing fluency of addition and subtraction</p> <ul style="list-style-type: none"> - Develops efficient mental strategies and algorithms to solve equations with multi-digit numbers. - Estimates sums and differences of multi-digit numbers.
---	--	--	---

Specific Expectation Addition and Subtraction			
<p>B2.4 use objects, diagrams, and equations to represent, describe, and solve situations involving addition and subtraction of whole numbers that add up to no more than 100</p>	<p>Teacher Cards Number Cluster 6: Conceptualizing Addition and Subtraction 26: Exploring Properties 27: Solving Problems 1 28: Solving Problems 2 29: Solving Problems 3 30: Solving Problems 4 30A: New Activity: Solving Problems with Larger Numbers 31: Conceptualizing Addition and Subtraction Consolidation 35: Multi-Digit Fluency</p> <p>Number Cluster 9: Financial Literacy 46: Saving Regularly</p> <p>Number Math Every Day Cards 5B: What's the Unknown Part? 6: What Math Do You See? What Could the Story Be? 7A: I Have... I Need... 7B: Hungry Bird</p>	<p>Array's Bakery Marbles, Alleys, Mibs, and Guli! The Great Dogsled Race</p> <p>To Scaffold: Canada's Oldest Sport</p> <p>To Extend: The Street Party Planting Seeds Calla's Jingle Dress Sports Camp</p>	<p>Big Idea: Quantities and numbers can be added and subtracted to determine how many or how much.</p>
			<p>Developing conceptual meaning of addition and subtraction</p> <ul style="list-style-type: none"> - Uses symbols and equations to represent addition and subtraction situations. - Models and symbolizes addition and subtraction problem types (i.e., join, separate, part-part-whole, and compare). <p>Developing fluency of addition and subtraction</p> <ul style="list-style-type: none"> - Extends known sums and differences to solve other equations (e.g., using $5 + 5$ to add $5 + 6$). - Fluently adds and subtracts with quantities to 20. - Develops efficient mental math strategies and algorithms to solve equations with multi-digit numbers.
Specific Expectation Multiplication and Division			
<p>B2.5 represent multiplication as repeated equal groups, including groups of one half and one fourth, and solve related problems using various tools and drawings</p>	<p>Teacher Cards Number Cluster 8: Early Multiplicative Thinking 40: Exploring Repeated Addition 41: Repeated Addition and Multiplication 42: Early Multiplicative Thinking Consolidation</p> <p>Number Math Every Day Cards</p>	<p>Array's Bakery Marbles, Alleys, Mibs, and Guli!</p> <p>To Extend: Hockey Homework Planting Seeds Sports Camp Calla's Jingle Dress</p>	<p>Big Idea: Numbers tell us how many and how much.</p>
			<p>Applying the principles of counting</p> <ul style="list-style-type: none"> - Fluently skip-counts by factors of 10 (e.g., 2, 5, 10) and multiples of 10 from any given number.
			<p>Big Idea: Quantities and numbers can be grouped by or partitioned into equal-sized units.</p> <p>Partitioning quantities to form fractions</p> <ul style="list-style-type: none"> - Counts by unit fractions

	<p>8A: Counting Equal Groups to Find How Many; I Spy</p> <p>8B: How Many Blocks?; How Many Ways?</p>		<p>Big Idea: Quantities and numbers can be grouped by, and partitioned into, units to determine how many or how much.</p> <p>Developing conceptual meaning of multiplication and division</p> <ul style="list-style-type: none"> - Models equal groups and uses multiplication symbol (\times) to symbolize operation. - Uses repeated addition of groups to solve problems. - Models and symbolizes single-digit multiplication problems involving equal groups or measures (i.e., equal jumps on a number line), and relates them to addition. <p>Big Idea: Regularity and repetition form patterns that can be generalized and predicted mathematically.</p> <p>Representing and generalizing increasing/decreasing patterns</p> <ul style="list-style-type: none"> - Identifies and extends familiar number patterns and makes connections to addition (e.g., skip-counting by 2s, 5s, 10s). <p>Big Idea: Patterns and relations can be represented with symbols, equations, and expressions.</p> <p>Using symbols, unknowns, and variables to represent mathematical relations</p> <ul style="list-style-type: none"> - Uses the equal ($=$) symbol in equations and knows its meaning (i.e., equivalent; is the same as).
<p>B2.6 represent division of up to 12 items as the equal sharing of a quantity and solve related problems, using various tools and drawings</p>	<p>Teacher Cards</p> <p>Number Cluster 8: Early Multiplicative Thinking</p> <p>37: Grouping in 2s, 5s, and 10s</p> <p>38: Making Equal Shares</p> <p>39: Making Equal Groups</p> <p>New Activity: Repeated Subtraction and Division</p> <p>42: Early Multiplicative Thinking Consolidation</p>	<p>Family Fun Day The Best Birthday Array’s Bakery Marbles, Alleys, Mibs, and Guli!</p> <p>To Scaffold: How Many Is Too Many?</p> <p>To Extend: Hockey Homework Planting Seeds Calla’s Jingle Dress</p>	<p>Big Idea: Quantities and numbers can be grouped by, and partitioned into, units to determine how many or how much.</p> <p>Developing conceptual meaning of multiplication and division</p> <ul style="list-style-type: none"> - Models and solves equal sharing problems to 10. - Groups objects into 2s, 5s, and 10s. - Models and solves equal sharing problems to 100. - Models and solve equal grouping problems to 100.

		Sports Camp	- Models and symbolizes equal sharing and grouping division problems and relates them to subtraction.

Mathology 2 Correlation (Data) – Ontario

Curriculum Expectations	Mathology Grade 2 Classroom Activity Kit	Mathology Little Books	Pearson Canada K–3 Mathematics Learning Progression
Overall Expectation			
D1. Data Literacy: manage, analyse, and use data to make convincing arguments and informed decisions, in various contexts drawn from real life			
Specific Expectation			
Data Collection and Organization			
D1.1 sort sets of data about people or things according to two attributes, using tables and logic diagrams, including Venn and Carroll diagrams	Teacher Cards Data Management and Probability Cluster 1: Data Management New Activity: Sorting Data <i>Teacher Cards</i> Geometry Cluster 1: 2-D Shapes 1: <i>Sorting 2-D Shapes</i> Geometry Cluster 2: 3-D Solids 1: <i>Sorting 3-D Solids</i>	I Spy Awesome Buildings The Tailor Shop To Scaffold: What Was Here?	Big Idea: Regularity and repetition form patterns that can be generalized and predicted mathematically. Identifying, sorting, and classifying attributes and patterns mathematically (e.g., number of sides, shape, size) - Sorts a set of objects based on two attributes.
D1.2 collect data through observations, experiments, and interviews to answer questions of interest that focus on two pieces of information, and organize the data using in two-way tally tables	Teacher Cards Data Management and Probability Cluster 1: Data Management 3: Creating a Survey 3A: New Activity: Collecting Experimental Data 6: Data Management Consolidation Data Management and Probability Math Every Day Card 1: Conducting Surveys	Big Buddy Days Marsh Watch To Scaffold: Graph It! To Extend: Welcome to the Nature Park	Big Idea: Formulating questions, collecting data, and consolidating data in visual and graphical displays help us understand, predict, and interpret situations that involve uncertainty, variability, and randomness. Collecting data and organizing them into categories - Collects data from simple surveys concretely (e.g., shoes, popsicle sticks) or using simple records (e.g., check marks, tallies). - Generates data by counting or measuring (e.g., linking cube tower; number of cubes or height). Limited to whole units.

Specific Expectation Data Visualization			
D1.3 display sets of data, using one-to-one correspondence, in concrete graphs, pictographs, line plots, and bar graphs with source, titles, and labels	Teacher Cards Data Management and Probability Cluster 1: Data Management 4: Making Graphs 1 5: Making Graphs 2 6: Data Management Consolidation	Big Buddy Days Marsh Watch To Scaffold: Graph It! To Extend: Welcome to the Nature Park	Big Idea: Formulating questions, collecting data, and consolidating data in visual and graphical displays help us understand, predict, and interpret situations that involve uncertainty, variability, and randomness. Creating graphical displays of collected data - Creates displays using objects or simple pictographs (may use symbol for data). - Creates one-to-one displays (e.g., line plot, dot plot, bar graph). - Displays data collected in more than one way and describes the differences (e.g., bar graph, pictograph).
Specific Expectation Data Analysis			
D1.4 identify the mode(s), if any, for various data sets presented in concrete graphs, pictographs, line plots, bar graphs, and tables, and explain what this measure indicates about the data.	Teacher Cards Data Management and Probability Cluster 1: Data Management New Activity: The Mode(s)		Big Idea: Formulating questions, collecting data, and consolidating data in visual and graphical displays help us understand, predict, and interpret situations that involve uncertainty, variability, and randomness. Reading and interpreting data displays - Describes the shape of data in informal ways (e.g., range, spread, gaps, mode).
D1.5 analyse different sets of data presented in various ways, including in logic diagrams, line plots, and bar graphs, by asking and answering questions about the data and drawing conclusions, then make convincing arguments and informed decisions	Teacher Cards Data Management and Probability Cluster 1: Data Management 1: Interpreting Graphs 1 2: Interpreting Graphs 2 4: Making Graphs 1 5: Making Graphs 2 6: Data Management Consolidation Data Management and Probability Math Every Day Card 1: Reading and Interpreting Graphs	Big Buddy Days Marsh Watch To Scaffold: Graph It! To Extend: Welcome to the Nature Park	Big Idea: Formulating questions, collecting data, and consolidating data in visual and graphical displays help us understand, predict, and interpret situations that involve uncertainty, variability, and randomness. Reading and interpreting data displays - Interprets displays by noting how many more/less than other categories. Drawing conclusions by making inferences and justifying decisions based on data collected - Poses and answers questions about data collected and displayed.

Overall Expectation D2. Probability: describe the likelihood that events will happen, and use that information to make predictions			
Specific Expectation Probability			
<p>D2.1 use mathematical language, including the terms “impossible”, “possible”, and “certain”, to describe the likelihood of complementary events happening, and use that likelihood to make predictions and informed decisions</p>	<p>Teacher Cards Data Management and Probability Cluster 2: Probability and Chance 7: Likelihood of Events 8: Conducting Experiments 9: Probability and Chance Consolidation</p> <p>Data Management and Probability Math Every Day Cards 2: What’s in the Bag?; Word of the Day</p>	<p>To Extend: Chance</p>	<p>Big Idea: Formulating questions, collecting data, and consolidating data in visual and graphical displays help us understand, predict, and interpret situations that involve uncertainty, variability, and randomness.</p> <p>Using the language of chance to describe and predict events</p> <ul style="list-style-type: none"> - Describes the likelihood of an event (e.g., impossible, unlikely, certain). - Makes predictions based on the question, context, and data presented. - Compares the likelihood of two events (e.g., more likely, less likely, equally likely). - Predicts the likelihood of an outcome in simple probability experiments or games.
<p>D2.2 make and test predictions about the likelihood that the mode(s) of a data set from one population will be the same for data collected from a different population</p>	<p>Teacher Cards New Activity: The Mode(s) Data Management and Probability Cluster 2: Probability and Chance 8: Conducting Experiments 9: Probability and Chance Consolidation</p>	<p>To Extend:</p> <ul style="list-style-type: none"> • Chance 	<p>Big Idea: Formulating questions, collecting data, and consolidating data in visual and graphical displays help us understand, predict, and interpret situations that involve uncertainty, variability, and randomness.</p> <p>Using the language of chance to describe and predict events</p> <ul style="list-style-type: none"> - Describes the likelihood of an event (e.g., impossible, unlikely, certain). - Makes predictions based on the question, context, and data presented. - Compares the likelihood of two events (e.g., more likely, less likely, equally likely). - Predicts the likelihood of an outcome in simple probability experiments or games.

Mathology 2 Correlation (Spatial Sense) – Ontario

Curriculum Expectations	Mathology Grade 2 Classroom Activity Kit	Mathology Little Books	Pearson Canada K–3 Mathematics Learning Progression
Overall Expectation			
E1. Geometric and Spatial Reasoning: describe and represent shape, location, and movement by applying geometric properties and spatial relationships in order to navigate the world around them			
Specific Expectation			
Geometric Reasoning			
E1.1 sort and identify two-dimensional shapes by comparing number of sides, side lengths, angles, and number of lines of symmetry	Teacher Cards Geometry Cluster 1: 2-D Shapes 1: Sorting 2-D Shapes 1 2: Exploring 2-D Shapes New Activity: Comparing Angles 4: Symmetry in 2-D Shapes 4A: New Activity: Sorting 2-D Shapes 2 5: 2-D Shapes Consolidation Geometry Math Every Day Cards 1: Visualizing Shapes; Comparing Shapes	I Spy Awesome Buildings Sharing Our Stories To Scaffold: The Tailor Shop What Was Here? • Memory Book	Big Idea: 2-D shapes and 3-D solids can be analyzed and classified in different ways by their attributes.
			Investigating geometric attributes and properties of 2-D shapes and 3-D solids - Compares 2-D shapes and 3-D solids to find the similarities and differences. - Analyzes geometric attributes of 2-D shapes and 3-D solids (e.g., number of sides/edges, faces, corners). - Classifies and names 2-D shapes and 3-D solids based on common attributes.
			Big Idea: 2-D shapes and 3-D solids can be transformed in many ways and analyzed for change. Exploring symmetry to analyze 2-D shapes and 3-D solids - Physically explores symmetry of images by folding, cutting, and matching parts. - Identifies 2-D shapes and 3-D solids that have symmetry (limited to line or plane symmetry) (e.g., slicing an apple through its core). - Identifies line(s) of symmetry on regular 2-D shapes.

			<p>Big Idea: Regularity and repetition form patterns that can be generalized and predicted mathematically.</p> <p>Identifying, sorting and classifying attributes and patterns mathematically (e.g. Number of sides, shape, size)</p> <ul style="list-style-type: none"> - Identifies the sorting rule used to sort sets. - Sorts a set of objects based on two attributes.
<p>E1.2 compose and decompose two-dimensional shapes, and show that the area of a shape remains constant regardless of how its parts are rearranged</p>	<p>Teacher Cards Geometry Cluster 3: Geometric Relationships 11: Making Shapes 15: Covering Outlines Math Every Day Card 3A: Fill Me In!</p>	The Discovery	<p>Big Idea: 2-D shapes and 3-D solids can be analyzed and classified in different ways by their attributes.</p> <p>Investigating 2-D shapes, 3-D solids, and their attributes through composition and decomposition</p> <ul style="list-style-type: none"> - Constructs and identifies new 2-D shapes and 3-D solids as a composite of other 2-D shapes and 3-D solids. - Decomposes 2-D shapes and 3-D solids into other known 2-D shapes and 3-D solids. - Completes a picture outline in more than one way. <p>Big Idea: Assigning a unit to a continuous attribute allows us to measure and make comparisons.</p> <p>Understanding relationships among measurement units</p> <ul style="list-style-type: none"> - Understands that decomposing and rearranging does not change the measure of an object.
<p>E1.3 identify congruent lengths and angles in two-dimensional shapes by mentally and physically matching them, and determine if the shapes are congruent</p>	<p>Teacher Cards Geometry Cluster 1: 2-D Shapes New Activity: Congruent Shapes 5: 2-D Shapes Consolidation</p>	Getting Ready for School	<p>Big Idea: 2-D shapes and 3-D solids can be analyzed and classified in different ways by their attributes.</p> <p>Investigating geometric attributes and properties of 2-D shapes and 3-D solids</p>

			<ul style="list-style-type: none"> - Compares 2-D shapes and 3-D solids to find the similarities and differences. - Analyzes geometric attributes of 2-D shapes and 3-D solids (e.g., number of sides/edges, faces, corners). <p>Big Idea: 2-D shapes and 3-D solids can be transformed in many ways and analyzed for change.</p> <p>Exploring 2-D shapes and 3-D solids by applying and visualizing transformations</p> <ul style="list-style-type: none"> - Matches familiar 2-D shapes and 3-D solids (e.g., square, triangle, cone) in different orientations. - Identifies congruent 2-D shapes and 3-D solids through physical movement (e.g., by rotating). - Identifies congruent 2-D shapes and 3-D solids through visualizing transformations.
Specific Expectation			
Location and Movement			
E1.4 create and interpret simple maps of familiar places	Teacher Cards Geometry Cluster 4: Location and Movement 18: Reading Maps 19: Drawing a Map Math Every Day Card 4A: Our Design; Treasure Map	To Scaffold: Memory Book	<p>Big Idea: Objects can be located in space and viewed from multiple perspectives.</p> <p>Locating and mapping objects in space</p> <ul style="list-style-type: none"> - Uses relative positions to describe the location and order of objects (e.g., between, beside, next, before). - Locates objects in the environment (e.g., playground) by interpreting a map - Makes simple maps based on familiar settings.
E1.5 describe the relative positions of several objects and the movements needed to get from one object to another	Teacher Cards Geometry Cluster 4: Location and Movement 18: Reading Maps 21: Location and Movement Consolidation Geometry Math Every Day Cards 5: Wandering Animals	Robo To Scaffold: Memory Book	<p>Big Idea: Objects can be located in space and viewed from multiple perspectives.</p> <p>Locating and mapping objects in space</p> <ul style="list-style-type: none"> - Uses positional language and gesture to describe locations and movement, and give simple directions (e.g., in, on, around, right, left). - Uses relative positions to describe the location and order of objects (e.g., between, beside, next, before). - Provides instructions to locate an object in the environment (e.g., listing instructions to find a hidden object in classroom).

			- Describes the movement of an object from one location to another on a grid map (e.g., moving 5 squares to the left and 3 squares down).
Overall Expectation			
E2. Measurement: compare, estimate, and determine measurements in various contexts			
Specific Expectation			
Length			
E2.1 choose and use non-standard units appropriately to measure lengths, and describe the inverse relationship between the size of a unit and the number of units needed	Teacher Cards Measurement Cluster 1: Using Non-Standard Units 1: Measuring Length 1 2: Measuring Length 2 3: Measuring Distance Around 7: Using Non-Standard Units Consolidation Measurement Math Every Day Cards 1: Estimation Scavenger Hunt; Estimation Station	Getting Ready for School The Discovery To Scaffold: The Amazing Seed Animal Measures To Extend: Goat Island Measurements About YOU!	Big Idea: Many things in our world (e.g., objects, spaces, events) have attributes that can be measured and compared.
			Understanding attributes that can be measured - Understands that some things have more than one attribute that can be measured (e.g., an object can have both length and mass). - Understands conservation of length (e.g., a string is the same length when straight and not straight), capacity (e.g., two differently shaped containers may hold the same amount), and area (e.g., two surfaces of different shapes can have the same area). - Extends understanding of length to other linear measurements (e.g., height, width, distance around).
			Big Idea: Assigning a unit to a continuous attribute allows us to measure and make comparisons.
			Selecting and using non-standard units to estimate, measure, and make comparisons - Understands that there should be no gaps or overlaps when measuring. - Demonstrates ways to estimate, measure, compare, and order objects by length, area, capacity, and mass with non-standard units by: using an intermediary object; using multiple copies of a unit; and iterating a single unit.

			<p>Understanding relationships among measurement units</p> <ul style="list-style-type: none"> - Compares different sized units and the effects on measuring objects (e.g., small cubes vs. large cubes to measure length). - Understands the inverse relationship between the size of the unit and the number of units (length, area, capacity, and mass).
<p>E2.2 explain the relationship between centimetres and metres as units of length, and use benchmarks for these units to estimate lengths</p>	<p>Teacher Cards Measurement Cluster 2: Using Standard Units 8: Benchmarks and Estimation 9: The Metre 10: The Centimetre 11: Metres or Centimetres 12: Using Standard Units Consolidation</p> <p>Measurement Math Every Day Cards 2: What Am I?</p>	<p>The Discovery</p> <p>To Extend: Goat Island Measurements About YOU!</p>	<p>Big Idea: Assigning a unit to a continuous attribute allows us to measure and make comparisons.</p> <p>Selecting and using standard units to estimate, measure, and make comparisons</p> <ul style="list-style-type: none"> - Demonstrates ways to estimate, measure, compare, and order objects by length, perimeter, area, capacity, and mass with standard units by: using an intermediary object of a known measure; using multiple copies of a unit; and iterating a single unit. - Selects and uses appropriate standard units to estimate, measure, and compare length, perimeter, area, capacity, mass, and time. - Uses the measurement of familiar objects as benchmarks to estimate another measure in standard units (e.g., doorknob is 1 m from the ground; room temperature is 21°C).
<p>E2.3 measure and draw lengths in centimetres and metres, using a measuring tool, and recognize the impact of starting at points other than zero</p>	<p>Teacher Cards Measurement Cluster 2: Using Standard Units 9: The Metre 10: The Centimetre 11: Metres or Centimetres 12: Using Standard Units Consolidation</p> <p>Measurement Math Every Day Card 2: Which Unit?</p>	<p>The Discovery</p> <p>To Extend: Goat Island Measurements About YOU!</p>	<p>Big Idea: Assigning a unit to a continuous attribute allows us to measure and make comparisons.</p> <p>Selecting and using standard units to estimate, measure, and make comparisons</p> <ul style="list-style-type: none"> - Demonstrates ways to estimate, measure, compare, and order objects by length, perimeter, area, capacity, and mass with standard units by: using an intermediary object of a known measure; using multiple copies of a unit; and iterating a single unit. - Selects and uses appropriate standard units to estimate, measure, and compare length, perimeter, area, capacity, mass, and time.

			<p>Understanding relationships among measurement units</p> <ul style="list-style-type: none"> - Understands relationship of units of length (mm, cm, m), mass (g, kg), capacity (mL, L), and time (e.g., seconds, minutes, hours).
<p>Specific Expectation Time</p>			

<p>E2.4 use units of time, including seconds, minutes, hours, and non-standard units, to describe the duration of various events</p>	<p>Teacher Card Measurement Cluster 3: Time and Temperature 15: Measuring Time New Activity: Measuring Time in Hours, Minutes, and Seconds</p>		<p>Big Idea: Many things in our world (e.g., objects, spaces, events) have attributes that can be measured and compared.</p> <p>Understanding attributes that can be measured</p> <ul style="list-style-type: none"> - Explores measurement of visible attributes (e.g., length, capacity, area) and non-visible attributes (e.g., mass, time, temperature).

Mathology 2 Correlation (Financial Literacy) – Ontario

Curriculum Expectations	Mathology Grade 2 Classroom Activity Kit	Mathology Little Books	Pearson Canada K–3 Mathematics Learning Progression
Overall Expectation F1. Money and Finances: demonstrate an understanding of the value of Canadian currency			
Specific Expectation Money Concepts			
F1.1 identify different ways of representing the same amount of money up to 200¢ Canadian using various combinations of coins, and up to \$200 using various combinations of \$1 and \$2 coins and \$5, \$10, \$20, \$50 and \$100 bills	Number Cluster 9: Financial Literacy 44: Earning Money New Activity: Money up to \$200 New Activity: ON Financial Literacy Consolidation Number Math Every Day Cards 9: Showing Money in Different Ways	The Money Jar To Scaffold Buy 1-Get 1	Big Idea: Numbers are related in many ways
			Decomposing wholes into parts and composing wholes from parts - Composes two-digit numbers from parts (e.g., 14 and 14 is 28) and decomposes two-digit numbers into parts (e.g., 28 is 20 and 8).
			Big Idea: Quantities and numbers can be grouped by or partitioned into equal-sized units.
			Unitizing quantities into ones, tens, and hundreds (place-value concepts) - Writes, reads, composes, and decomposes three-digit numbers using ones, tens, and hundreds.
