

Moonlit Mountain Readers
Alignment to *Jump Rope Readers*

The *Moonlit Mountain Readers* series follows the same general phonics scope and sequence as the *Jump Rope Readers* while providing beginning readers with more concentrated practice with key phonics concepts. There is also a more gradual ramp into decoding longer and more complex words. For example, when a new letter-sound relationship is first introduced, such as the digraph, *ch*, the corresponding text will offer the reader massive practice with the target phonics feature, prioritizing 3 phoneme words, like *chop* and *much*, before including words with more phonemes such as *chunk* or *stench*.
