<p>This program helps learners express needs and identify preferences in authentic, real-life situations. The language learner is a social agent who communicates with others in a variety of situations. Students increase their confidence as they engage and explore while also increasing their vocabulary and language skills. Students are able to demonstrate success by being given daily opportunities to listen, speak, and interact in French using a range of language learning strategies. These strategies highlight best practices in second-language acquisition as they pertain to differentiation, assessment, and metacognition. Concepts and language are introduced and modelled through the gradual release of responsibility which scaffold and support students in completing action oriented tasks.</p> <p><b>This program is well designed and fits very well with the First Peoples Principles of Learning:</b></p> <p>Learning ultimately supports the well-being of the self, the family, the community, the land, the spirits, and the ancestors.</p> <p>Learning is holistic, reflexive, reflective, experiential, and relational.</p> <p>Learning involves recognizing the consequences of one's actions.
