

Setting up your classroom:

- Limit distracting visual and auditory stimuli. Aim for a calm and peaceful feel.
- Keep clutter under control. Model effective organization.
- Group noisier activity spaces and quieter ones so they do not interfere with each other.
- Have a special place for student-teacher or student-student conferences.
- Be flexible with seating arrangements and consider when students might need a place for calm and focused thinking or small-group work.
- Choose your transitioning signals carefully (e.g., a quiet drum, a subtle bell, music).
- Have a predictable (but flexible) routine to help students anticipate and prepare.
- Have available fidget toys or worry beads for calming.
- Keep track of triggers for hypo- or hyperactivity and make modifications to facilitate self-regulation.
- Create a safe and caring environment where students feel they have ownership.

Fostering emotional regulation:

- Familiarize yourself with resources on emotional self-regulation (e.g., CASEL, Edutopia, the Canadian Safe School Network).
- Encourage and reinforce cooperation, collaboration, tolerance, respectful behaviour, and kindness. Trust matters!
- Introduce relaxation techniques, such as deep breathing, mindful awareness, and yoga.
- Modulate your own emotional responses and share how you do it.
- Help students to express their feelings using the directing, relating, and expressing functions of language (see pp. 27–31 of this resource).

Strategizing to enhance focus and attention:

- Be consistent in teaching and learning techniques and scheduling so students can anticipate, get prepared, and focus accordingly.
- Teach goal-setting and planning strategies directly.
- Build up attention span by eliminating unnecessary interruptions and providing appropriate breaks.
- Watch for indications of the need for some help, and indicate that students need to develop appropriate help-seeking strategies. Ask students to consider what they can do when they are stuck, confused, or need more information.
- Help students develop methods to self-monitor (e.g., lists, folders, sticky notes).
- Look for ways to make learning fun, motivating, and engaging.
- Provide concentration spots where students can go if they need extra quiet or limited distraction when working on something in particular.
- Deliver complicated instructions in more than one mode. Check for understanding.
- Give choice and ownership.
- Make sure that your demonstrations and modelling are clear.
- Help students develop personalized mnemonics that match their learning style and preferred modality.
- Aim for engagement. Motivation increases and self-regulation becomes easier.
