## Activity 7 Assessment

## Transformations on a Grid

| Applying and Visualizing Transformations on a Grid |  |  |  |
| :---: | :---: | :---: | :---: |
| Identifies and describes transformations on a grid. <br> "This shows a translation because the shape and the image face the same way." | Describes and performs single transformations on a grid. <br> "The shape was rotated $90^{\circ}$ about the point of rotation C to get the Image." | Describes and performs combinations of transformations. <br> "The triangle is rotated $270^{\circ}$ clockwise about vertex $B$, then reflected in the vertical line." | Visualizes, describes, and flexibly performs a combination of transformations. <br> "I visualize reflecting triangle LMN in the vertical line of reflection, then rotating the image $90^{\circ}$ counterclockwise about N ' to get triangle L"M"N"." |
