

# Master 37: Activity 18 Assessment

## Geometric Relationships: Consolidation

Identifying Shapes Used to Create Outlines Behaviours/Strategies			
<p>Student is unable to predict which blocks were used to make the outline.</p>	<p>Student randomly places blocks in the outline with no thought to the lines.</p> 	<p>Student accurately places blocks in the outline, but thinks there is only one way to fill it.</p> 	<p>Student accurately predicts the blocks used, fills the outline to check, and realizes there are many ways to fill it.</p>
Observations/Documentation			
Identifying Solids Used to Make Structures Behaviours/Strategies			
<p>Student uses gestures or non-geometric language to identify the solids.</p> <p>"It looks like a party hat."</p>	<p>Student knows the solids that were used but cannot name them by their mathematical names.</p>	<p>Student accurately names the solids but does not use geometric language to describe them.</p>	<p>Student uses geometric language with ease to name and describe the solids used.</p>
Observations/Documentation
