

# Master 23: Activity 12 Assessment

Time: Consolidation

Describing and Identifying Cycles of Time Behaviours/Strategies		
Student has difficulty describing cycles of time in daily routines and nature.	Student has difficulty describing observable changes that indicate a cycle of time.	Student mixes up the order of the days of the week, the months of the year, or the seasons.
Observations/Documentation		
Student has difficulty identifying the cycle in the days of the week.	Student identifies the cycle in the days of the week but has difficulty identifying the cycle in the months of the year.	Student describes cycles of time in daily routines and nature, including observable changes indicative of a cycle, and identifies cycles from a calendar with ease.
Observations/Documentation
