

# Master 6: Activity 2 Assessment

## Identifying Triangles

Identifying Triangles Behaviours/Strategies		
<p>Student does not have a mental image of a triangle and cannot identify a triangle.</p>	<p>Student only recognizes an equilateral or right triangle as a triangle.</p> <div style="text-align: center;">  </div>	<p>Student recognizes some triangles but thinks that a triangle that is oriented differently is not a triangle.</p> <div style="text-align: center;">  </div>
Observations/Documentation		
<p>Student uses a shape's appearance, not its geometric attributes, to identify a triangle.</p> <div style="text-align: center;">  <p>"It looks like a triangle."</p> </div>	<p>Student successfully identifies triangles but has difficulty communicating why a shape was put in a particular column.</p>	<p>Student successfully identifies triangles and explains why a shape is or is not a triangle.</p>
Observations/Documentation
