Master 3: Activity 1 Assessment
Sorting Data

Sorting Objects Using One Attribute Behaviours/Strategies			
Student identifies attributes of objects but struggles to sort them.	Student sorts a collection of objects in one way.	Student sorts a collection of objects in different ways but can't identify sorting rule for pre-sorted set.	Student flexibly sorts a collection of objects in different ways and identifies sorting rule for pre-sorted set.
"The letters are of different colours and sizes. Some are big letters and some are small."	"These letters are small and these letters are big. I don't know how to sort them another way."	"I sorted into 2 groups: letters with curves and letters without curves." "I'm not sure what the sorting rule is. The colours are different and the sizes are different."	"The sorting rule is: Objects with holes and objects without holes."
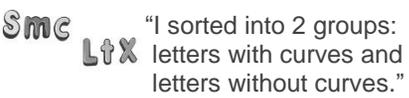

Observations/Documentation
