

Master 3: Activity 1 Assessment

Identifying Attributes

Identifying Measurable Attributes Behaviours/Strategies			
<p>Student describes only one attribute of an everyday object.</p>	<p>Student describes multiple attributes of an everyday object.</p>	<p>Student matches description of attributes to their names but struggles to identify matching 3-D solid.</p>	<p>Student successfully describes and names attributes of objects and identifies matching 3-D solid.</p>
			
<p>“All I know is that the carton holds juice.”</p>	<p>“The juice box is short and narrow, it has square corners, it holds juice, and it’s not very heavy.”</p>	<p>“The juice box holds juice, so it has capacity. It is short, so it has height. It has square corners, so it has angles. I’m not sure which solid it looks like.”</p>	<p>“The juice box is like a prism.”</p>
Observations/Documentation
