

Master 10: Activity 3 Assessment

Counting On and Back

Counting On and Counting Back Behaviours/Strategies		
Student mixes up the number sequence when counting on. “... 4, 5, 7, 6, 9”	Student says the number word in between each “hop,” or does not say one number word for each space counted.	Student counts from 1 to find out which space the game piece is on.
Observations/Documentation		
Student is able to count on, but mixes up the number sequence when counting back. “... 10, 9, 7”	Student is able to count on and back but loses track of the number counted on or back. “5, 6, 7, 8, ... Did I count enough?”	Student is able to count on or back with ease. “20, 19, 18, 17, 16, 15”
Observations/Documentation
