

Master 114: Activity 17 Assessment

Comparing Unit Fractions of Different Wholes

Comparing Fractions of Different Wholes Behaviours/Strategies		
<p>1. Student struggles to divide a whole into equal unit fractions.</p> 	<p>2. Student is able to divide a whole into equal unit fractions.</p>  <p>"I know they have to be equal, but I don't know what to call it."</p>	<p>3. Student is unable to see various ways to show the same unit fraction with different wholes in order to compare</p> 
Observations/Documentation		
<p>4. Student is able to partition unit fractions of different wholes but struggles to compare them.</p>  <p>"I don't know which is bigger: one-half of the purple rod or one-half of the orange rod."</p>	<p>5. Student is able to partition and compare unit fractions of different wholes but does not realize that bigger wholes will produce bigger unit fractions.</p>  <p>"One-fourth of the brown rod is bigger than one-fourth of the purple rod."</p>	<p>6. Student is able to successfully partition, name and compare unit fractions of different wholes, realizing that bigger wholes will produce bigger unit fractions.</p>  <p>"One-half of the orange rod is bigger than one-half of the purple rod."</p>
Observations/Documentation
