Master 36: Activity 16 Assessment Equal and Unequal Sets

| Creating Equal and Unequal Sets Behaviours/Strategies |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- |
| 1. Student guesses to create a set <br> that is more/less than or equal to <br> a given set. | 2. Student creates a set that is <br> equal to a given set, but thinks <br> the sets must be identical (e.g., <br> uses the same number of each <br> colour of cube and/or arranges <br> the cubes in the same way). | 3. Student creates a set that is <br> more/less than or equal to a <br> given set, but strugggles to use <br> the pan balance to check. | 4. Student successfully creates sets <br> that are more/less than or equal <br> to a given set. |  |
| Observations/Documentation |  |  |  |  |
|  |  |  |  |  |

Identifying the Unequal Set Behaviours/Strategies

| 1. Student guesses and is unable to <br> compare sets to identify the <br> unequal set. | 2. Student uses one-to-one <br> matching to compare sets and <br> identify the unequal set. | 3.Student counts to compare sets <br> and identify the unequal set, but <br> is unable to explain thinking. <br> Observations/Documentation | 4. Student succesfully compares <br> sets to itentify the unequal set <br> and explains thinking. |
