

Sorting Objects Behaviours/Strategies				
1. Student sorts a set of objects, but can only sort by colour (cannot sort in different ways).	2. Student sorts a set of objects in different ways, but struggles to determine which group has the most objects.	3. Student sorts a set of objects in different ways and aligns objects to compare, but thinks the longer line always has more.	4. Student successfully sorts a set of objects in different ways using a single attribute and makes comparisons.	
Observations/Documentation
