

Master 38: Activity 14 Assessment

Months in a Year

Relating Months and Years Behaviours/Strategies		
1. Student chooses a card, but does not know the months of the year.	2. Student reads the months on the calendar, but struggles with the use of ordinal numbers in context. <div>Ninth month "I don't know what ninth means."</div>	3. Student understands the use of ordinal numbers in context, but struggles to say the number name sequence starting with 1 and counting forward. <div>Ninth month "1, 2, 3, 5, 6, 8, q" "July."</div>
Observations/Documentation		
4. Student understands the use of ordinal numbers in context, but relies on a calendar to answer clue cards.	5. Student understands the use of ordinal numbers in context, but is unable to order the months without referring to a calendar.	6. Student understands the relationship of units of time (e.g., months and years), successfully answers all clue cards, and orders the cards by month.
Observations/Documentation
