

# Master 35: Activity 13 Assessment

## Days and Weeks

Relating Days and Weeks Behaviours/Strategies		
1. Student chooses a card, but does not know or cannot read the days of the week on the calendar.	2. Student reads the days on the calendar, but struggles with the use of ordinal numbers in context. <div>I am the second Wednesday in the month.</div> <div>"I don't know what second means."</div>	3. Student chooses a card, but struggles to count forward or backward 7 from a given number to count on or back one week.
Observations/Documentation		
4. Student understands the attributes of a calendar, but does not recognize patterns on a calendar page.	5. Student understands the attributes of a calendar, but does not provide a complete description when providing a date. <div>"Monday 6th" or "Monday 6"</div>	6. Student understands the relationship of units of time (e.g., days and weeks) and successfully solves all calendar problems.
Observations/Documentation
