

Master 29: Activity 11 Assessment

Making Shapes

Constructing 2-D Shapes from Other Shapes Behaviours/Strategies		
1. Student looks at the outline, but does not know which 2-D shapes to use to construct a composite shape (hexagon).	2. Student places blocks randomly with no thought to the outline to construct a composite shape (hexagon) from other 2-D shapes.	3. Student constructs a composite shape (hexagon) from other 2-D shapes, but leaves gaps or overlaps when using blocks to cover hexagon.
Observations/Documentation		
4. Student constructs a composite shape (hexagon) from other 2-D shapes, but cannot construct it in a different way.	5. Student constructs a composite shape (hexagon) from other 2-D shapes, but struggles to describe and identify shapes used.	6. Student constructs a composite shape (hexagon) from other 2-D shapes in different ways and identifies shapes used.
Observations/Documentation		

"I used a trapezoid, a rhombus, and a triangle."

"I used a red, a green, and a blue block."
