Measurement Cluster 1: Using Non-Standard Units

Ontario

Curriculum Expectations	Mathology Grade 2 Classroom Activity Kit	Mathology Little Books	Pearson Canada K-3 Mathematics Learning Progression
Overall Expectations Attributes, Units, and Measurement Sense: estimate, measure, and record length, perimeter, area, mass, capacity, time, and temperature, using non-standard units and standard units Measurement Relationships: compare, describe, and order objects, using attributes measured in non-standard units and standard units. Cross Strand: Number Counting: demonstrate an understanding of magnitude by counting forward to 200 and backwards from 50, using multiples of various numbers as starting points			
M2.2 estimate and measure length, height, and distance, using standard units (i.e., centimetre, metre) and non-standard units M2.3 record and represent measurements of length, height, and distance in a variety of ways (e.g., written, pictorial, concrete) M2.5 estimate, measure, and record the distance around objects, using non-standard units M2.6 estimate, measure, and record area, through investigation using a variety of non-standard units	Below Grade: Intervention 1: Exploring Length 2: Conserving Area On Grade: Teacher Cards 1: Measuring Length 1 (M2.2, M2.3, N2.9) 2: Measuring Length 2 (M2.2, M2.3, N2.9) 3: Measuring Distance Around (M2.5, N2.9) 4: Measuring Mass (M2.7, M2.13, N2.9) 5: Measuring Area (M2.6, N2.9) 6: Measuring Capacity (M2.7, M2.13, N2.9) 7: Using Non-Standard Units Consolidation (M2.2, M2.3, M2.5, M2.6, M2.7, N2.9)	Below Grade: <ul style="list-style-type: none"> The Amazing Seed (Activities 1, 2, 7) Animal Measures (Activities 1, 2, 7) On Grade: <ul style="list-style-type: none"> Getting Ready for School (Activities 1, 2, 3, 7) The Discovery (Activities 2, 3, 5, 7) 	Big Idea: Assigning a unit to a continuous attribute allows us to measure and make comparisons. Selecting and Using Non-Standard Units to Estimate, Measure, and Make Comparisons <ul style="list-style-type: none"> Understands that there should be no gaps or overlaps when measuring. (Activities 1, 2, 3, 5, 7) Demonstrates ways to estimate, measure, compare, and order objects by length, area, capacity, and mass with non-standard units by <ul style="list-style-type: none"> using an intermediary object (Activities 6, 7) using multiple copies of a unit (Activities 1, 3, 4, 5, 7) iterating a single unit (Activities 2, 3, 5, 7) Selects and uses appropriate non-standard units to estimate, measure, and compare length, area, capacity, and mass. (Activity 7; MED 1: 1, 2) Understanding Relationships Among Measurement Units <ul style="list-style-type: none"> Understands the inverse relationship between the size of the unit and the number of units (length, area, capacity, and mass). (Activities 1, 4) Big Idea: Many things in our world (e.g., objects, spaces, events) have attributes that can be measured and compared. Understanding Attributes That Can Be Measured
