

Master 39: Activity 17 Assessment

Exploring Number Sentences

Exploring Number Sentences Behaviours/Strategies		
<p>1. Student chooses a number sentence, but struggles to compare expressions and compares one number on each side (e.g., compares 13 and 7 for $13 - 5 = 7 + 2$).</p>	<p>2. Student takes cubes, but struggles to model add-to and take-from situations with cubes.</p>	<p>3. Student models add-to and take-from situations with cubes and compares expressions by comparing lengths or using one-to-one matching.</p> 
Observations/Documentation		
<p>4. Student models add-to and take-from situations with cubes and compares expressions by counting. "1, 2, 3, ..., 6, 7, 8"  "1, 2, 3, ..., 7, 8, 9"  "The sides are not equal."</p>	<p>5. Student models add-to and take-from situations with cubes and compares expressions, but does not understand when to use the equal (=) and not equal (\neq) symbols. "I'm not sure which sign to use."</p>	<p>6. Student models add-to and take-from situations with cubes, and understands and uses the equal (=) and not equal (\neq) symbols when comparing expressions.</p>
Observations/Documentation
