

Activity 6 Assessment

First Nations, Métis, or Inuit Representations of Data

Ways of Representing Data			
<p>Understands the importance of offering thanks when receiving gifts from the land (e.g., food, sticks)</p> <p>“It is important to thank the land because it provides us with food and things we need to live: ‘kinanâskomitin’ means ‘thank you’ in Cree.”</p>	<p>Engages in oral practices (conversations, stories) to describe the results of the game to encourage others</p> <p>“On their first toss, Stick Tosser 1 scored 10 points. I said ‘ahkameyimok,’ which means ‘never give up’ in Cree. They then scored 100 points on their second toss.”</p>	<p>Keeps track of own results and reflects on effectiveness of strategy</p> <p>“I realized that when I set the stick a little closer to the front of my foot, I could toss the stick farther. With practice, I was scoring 1000 points most of the time.”</p>	<p>Tells a story about own learnings and observations during the game</p> <p>“I noticed that with more practice and encouragement from others, by the fourth toss I was able to score the greatest number of points.”</p>
Observations/Documentation
