Number

Activity 19 Assessment
Repeated Addition and Multiplication

Multiplying 1-Digit Numbers

Groups objects and counts by 1s	Groups objects and skip-counts	Uses repeated addition	Models using multiplicative thinking
	"2, 4, 6, 8"	"2 + 2 + 2 + 2 = 8."	"4 rows of 2 is 8."
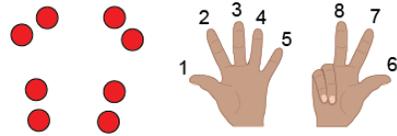

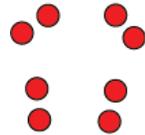

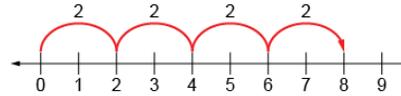

Observations/Documentation

Understands relationship between operations	Uses multiplication symbol	Multiplies fluently (e.g., uses properties of multiplication)	Creates and solves problems involving equal groups
"I can think of 2 + 2 + 2 + 2 = 8 as 4 groups of 2."	"4 × 2 = 8"	"4 × 2 = 8 2 × 4 = 8"	4 × 2 = 8 "There are 4 bicycles in the shed. How many wheels are there altogether?"
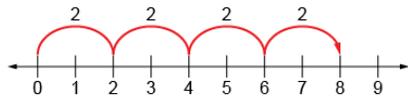

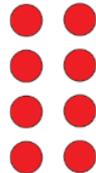

Observations/Documentation
