Identifying Symmetrical Designs

Exploring Symmetry with 2-D Shapes

Identifies a line of symmetry in a design

"I see one line of symmetry. If I fold the design on the line, the 2 sides match exactly."

Completes a symmetrical design, placing most shapes correctly

"I'm not sure about the blue block, but it looks right to me."

Successfully completes a symmetrical design and uses math language to describe it

"This design is symmetrical because all the blocks below the line are reflections of the blocks above the line. I used a Mira to check."

Constructs symmetrical designs and identifies all lines of symmetry

"I made my own design. It has 2 lines of symmetry."

Observations/Documentation
