Describing Likelihood of Events

| Describing and Predicting Likelihood of Outcomes |  |  |
| :---: | :---: | :---: |
| Describes the likelihood of an outcome using language of probability (e.g., impossible, likely, equally likely). <br> "Landing on red and landing on blue are equally likely." | Makes comparisons to order the likelihoods of outcomes (on a probability line). | Identifies the likelihood of an outcome for an experiment using words. <br> "The likelihood of landing on blue is 2 out of 8 ." |

Activity 5 Assessment
Describing Likelihood of Events

| Describing and Predicting Likelihood of Outcomes (cont'd) |  |  |
| :---: | :---: | :---: |
| Makes predictions based on likelihoods. <br> "The likelihood of landing on blue is 2 out of 8 , so in 40 trials, I think it will land on blue 10 times." | Conducts experiments to check predictions about likelihood of outcomes. <br> "I performed the experiment and the pointer landed on orange 23 times and on blue 17 times. That's not what I predicted. I thought I would get orange 30 times." | Conducts experiments and realizes that as more trials are conducted, the closer the results will likely be to the predictions. <br> "I performed the experiment 100 times and the results were much closer to my predictions." |
