## Measurement

## Lesson 2 Assessment Calculating Circumference

| Calculating Circumference                                                                                                                                                                         |                                                                                                                                                                                    |                                                                                                                                                                                                          |                                                                                                                                                                                                                                                         |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Uses relationships between radius,<br>diameter, and circumference to<br>explain formulas for circumference                                                                                        | Calculates the circumference of a circle, given its diameter                                                                                                                       | Calculates the circumference of a circle, given its radius                                                                                                                                               | Uses circumference formulas to solve problems                                                                                                                                                                                                           |
| If I know the diameter, I can multiply<br>by $\pi$ to find the circumference. I can<br>use the formula $C = \pi \times d$ to<br>represent the relationship between<br>circumference and diameter. | What is the circumference of a circle<br>with diameter of 8 m?<br>I used the formula $C = \pi \times d$ .<br>$3.14 \times 8 = 25.12$<br>The circumference of circle is<br>25.12 m. | What is the circumference of a circle<br>with radius of 10 cm?<br>I used the formula $C = 2 \times \pi \times r$ .<br>$2 \times 3.14 \times 10 = 62.8$<br>The circumference of the circle<br>is 62.8 cm. | What is the circumference of a<br>largest circle that fits inside a 12 m<br>by 18 m rectangle?<br>I used the width of rectangle as the<br>diameter of the circle.<br>$3.14 \times 12 = 37.68$<br>The circumference of the largest<br>circle is 37.68 m. |
| Observations/Documentation                                                                                                                                                                        |                                                                                                                                                                                    |                                                                                                                                                                                                          |                                                                                                                                                                                                                                                         |
|                                                                                                                                                                                                   |                                                                                                                                                                                    |                                                                                                                                                                                                          |                                                                                                                                                                                                                                                         |
