Answers

6. There is an error in the *drawTriangle* subprogram.
   The first glide should say:
   glide for 0.5 seconds to (**BXCoord**, **BYCoord**).

7. Answers will vary. Samples:
   - It is easier to see what is happening in the program when it is broken up into smaller pieces.
   - When debugging, you can look for errors in a specific subprogram if you think you know that's where the problem might be.
   - If you want to change part of the program or add something, it's easier to do when each procedure is in its own subprogram.
