

How Can You Represent the Data?

For each data set:

- Draw two different graphs to represent the data.
- Justify your choice of graphs.

Data set 1:
Favourite Streaming Service

Streaming app	Number of students	Number of teachers
Goodflix	5	9
TV Plus	2	1
Superview	3	1
ViewIt	2	1

Data set 2:
Average Monthly Rainforest Rainfall

Month	Rainfall amount (mm)
January	260
February	280
March	320
April	300
May	258
June	115
July	90
August	55
September	75
October	130
November	175
December	210
