Name_____ Date_____
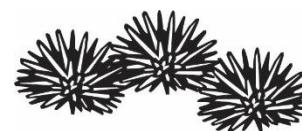

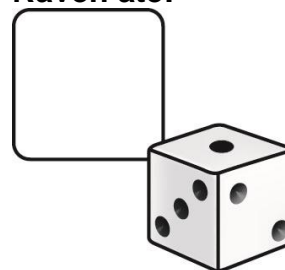

# How many xihwu (urchins)?

Roll three number cubes.

- Put one number cube in each box to show how many the raven ate, how many are carried each trip, and how many trips there were.
- Use the values to complete the table.
- Write an equation to represent the relation.
- The player with the greater number of xihwu after the given number of trips gets one point.

Raven ate:

Equation:

| Number of trips	Number of xihwu (urchins)
0	
1	
2	
3	
4	
5	
6	

Xihwu (urchins) per trip:

Number of trips:
