## Activity 26 Assessment

## Estimating Quotients

| Conceptual Meaning of Multiplication and Division with Larger Numbers |  |  |
| :---: | :---: | :---: |
| Models multiplication and division situations concretely and pictorially $6 \times 287=?$ <br> "I traded groups of 10 rods for a flat." | Models multiplication and division situations using an open array$6 \times 287=?$287   <br> 200 80 7 <br> 1200 480 42   <br> "I can use an open array to help me multiply." | Uses place value to multiply and divide natural numbers by 10, 100, and 1000 $\begin{aligned} 34 \times 200 & =34 \times 2 \times 100 \\ & =68 \times 100 \\ & =6800 \end{aligned}$ <br> "I used the associative property to make friendly numbers." |

## Activity 26 Assessment

## Estimating Quotients

| Conceptual Meaning of Multiplication and Division with Larger Numbers (cont'd) |  |  |
| :---: | :---: | :---: |
| Decomposes numbers and uses standard algorithm to multiply and divide $\begin{array}{r} 6 \times 287=? \\ 54 \\ 287 \\ \times \quad 6 \\ \hline 1722 \end{array}$ <br> "I used the standard algorithm to multiply the numbers." | Estimates to determine if answer to multiplication or division problem is reasonable $\begin{gathered} 6 \times 287=1722 \\ 287 \text { is close to } 300 . \\ 6 \times 300=1800 \end{gathered}$ <br> " 1800 is close to the answer I calculate, 1722. So, my answer is reasonable." | Creates and solves multiplication and division problems flexibly using a variety of strategies $123 \div 6=?$ <br> "I counted 123 photographs to put in an album. Each page can hold 6 photographs. How many pages will I need?" $\begin{gathered} 20 \mathrm{R} 3 \\ 6 \longdiv { 1 2 3 } \\ \frac{120}{3} \end{gathered}$ <br> "I round up to 21 pages to be sure all photos will fit." |
