

Activity 21 Assessment

Estimating Sums and Differences with Decimals

Conceptual Meaning of Addition and Subtraction of Decimals

Recognizes addition and subtraction situations and models concretely or pictorially to add or subtract to hundredths (using hundredths grids or Base Ten Blocks)

“86 hundredths – 23 hundredths =
63 hundredths
 $25 - 17 = 8$ ”

$$25.86 - 17.23 = 8.63$$

Uses an understanding of place value to add or subtract decimals with hundredths (using standard algorithm)

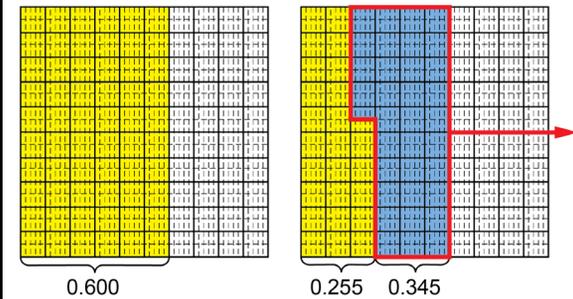

$$25.86 - 17.23 = ?$$

$$\begin{array}{r} 1 \\ 25.86 \\ - 17.23 \\ \hline 8.63 \end{array}$$

“I used the standard algorithm to subtract the hundredths, then the tenths, and then the whole numbers.”

Models to add or subtract decimals with thousandths (e.g., using thousandths grids or number lines)

$$43.600 - 1.345 = ?$$

“600 thousandths – 345 thousandths =
255 thousandths
 $43 - 1 = 42$.”

$$43.6 - 1.345 = 42.255$$

Observations/Documentation

Activity 21 Assessment

Estimating Sums and Differences with Decimals

Conceptual Meaning of Addition and Subtraction of Decimals (cont'd)

Uses an understanding of place value to add or subtract decimals with thousandths (e.g., using standard algorithm)

$$\begin{array}{r}
 ^5 ^9 ^1 \\
 43.\cancel{6}00 \\
 - 1.345 \\
 \hline
 42.255
 \end{array}$$

"I used the standard algorithm to subtract the thousandths, then the hundredths, then the tenths, and then the whole numbers."

Uses estimation and mental math strategies to check reasonableness of solutions

$$\begin{aligned}
 43.6 - 1.345 &= 42.255 \\
 43.6 \text{ is close to } 44. \quad 1.345 \text{ is close to } 1. \\
 44 - 1 &= 43
 \end{aligned}$$

"42.255 is the answer I calculated, and it is close to 43, so my answer is reasonable."

Solves addition and subtraction problems flexibly, using a variety of strategies

Naomi swam 1.5 km, rode a bicycle for 35.29 km, and ran for 8.375 km. What was the total distance Naomi travelled?

$$1.5 \text{ km} + 35.29 \text{ km} + 8.375 \text{ km} = ?$$

$$\begin{array}{r}
 ^1 ^1 \\
 ^1 1.500 \\
 35.290 \\
 + 8.375 \\
 \hline
 45.165
 \end{array}$$

"I wrote each number as a decimal with thousandths.
Naomi travelled 45.165 km in total."

Observations/Documentation
