<b>A. STEM Skills and Connections</b>								
A1. STEM Investigation and Communication Skills				Use a scientific research process, a scientific experimentation process, and an engineering design process to conduct investigations, following appropriate health and safety procedures				
A2. Coding and Emerging Technologies				Use coding in investigations and to model concepts, and assess the impact of coding and of emerging technologies on everyday life				
A3. Applications, Connections, and Contributions				Demonstrate an understanding of the practical applications of science and technology, and of contributions to science and technology from people with diverse lived experiences

<b>A. STEM Skills and Connections</b>								
A1. STEM Investigation and Communication Skills				Use a scientific research process, a scientific experimentation process, and an engineering design process to conduct investigations, following appropriate health and safety procedures				
A2. Coding and Emerging Technologies				Use coding in investigations and to model concepts, and assess the impact of coding and of emerging technologies on everyday life and in STEM-related fields				
A3. Applications, Connections, and Contributions				Demonstrate an understanding of the practical applications of science and technology, and of contributions to science and technology from people with diverse lived experiences

C. Matter and Energy: Properties of and Changes in Matter								
C1. Relating Science and Technology to Our Changing World		Assess the impacts on society and the environment of various processes and materials used in the manufacture of common products, and ways to mitigate negative impacts						
C2. Exploring and Understanding Concepts		Demonstrate an understanding of the properties of matter, changes of state, and physical and chemical change

**C. Matter and Energy: Electrical Phenomena, Energy, and Devices**

C1. Relating Science and Technology to Our Changing World		Evaluate the impact of the use and generation of electrical energy on society and the environment, and suggest ways to use electrical energy responsibly						
C2. Exploring and Understanding Concepts		Demonstrate an understanding of the principles of electrical energy and its transformation into and from other forms of energy
