

## ***Moonlit Mountain Readers Scope and Sequence***

The *Moonlit Mountain Readers* series offers young readers systematic practice with essential phonics concepts, following a carefully sequenced progression. Each book provides concentrated decoding practice with new phonics features, building skills step by step. For instance, when introducing a digraph like "ch," early texts focus on simple three-phoneme words such as *chop* and *much* before gradually incorporating more complex words like *chunk* or *stench*. This intentional approach ensures readers gain confidence with new concepts while reinforcing previously learned skills. The series follows a structured phonics scope and sequence, with Set A introducing foundational skills and Set B expanding into advanced phonics and multisyllabic words. Each series also adds a new batch of high-frequency words for readers to practice. Cumulative review books within each series provide landing points to consolidate learning, reinforcing earlier concepts without adding new ones. This design supports a steady, staircase-like progression through phonics and decoding challenges.
